Airport Noise Control Strategies

Introduction

The Airport Noise Control Strategies Data File represents an effort to compile a comprehensive listing of airport noise control actions within one convenient source. The information contained in this data file was taken from the Environmental Data Bank (EDB) of March 1979 and then updated to reflect the many changes that have occurred since the EDB was published. The FAA collected data from organizations such as the National Business Aircraft Association and the Aircraft Operators Council International. Additional data were garnered from the FAA Airport Facility Directory. The FAA regional offices reviewed the information and, in some instances, collected data directly from airports. While the FAA has made every effort to insure that the listing is both complete and accurate, the data contained in this report may not reflect all U.S. airports that have taken significant noise control action. There will be updated versions of this report periodically so that any changes or additions can be made at that time.

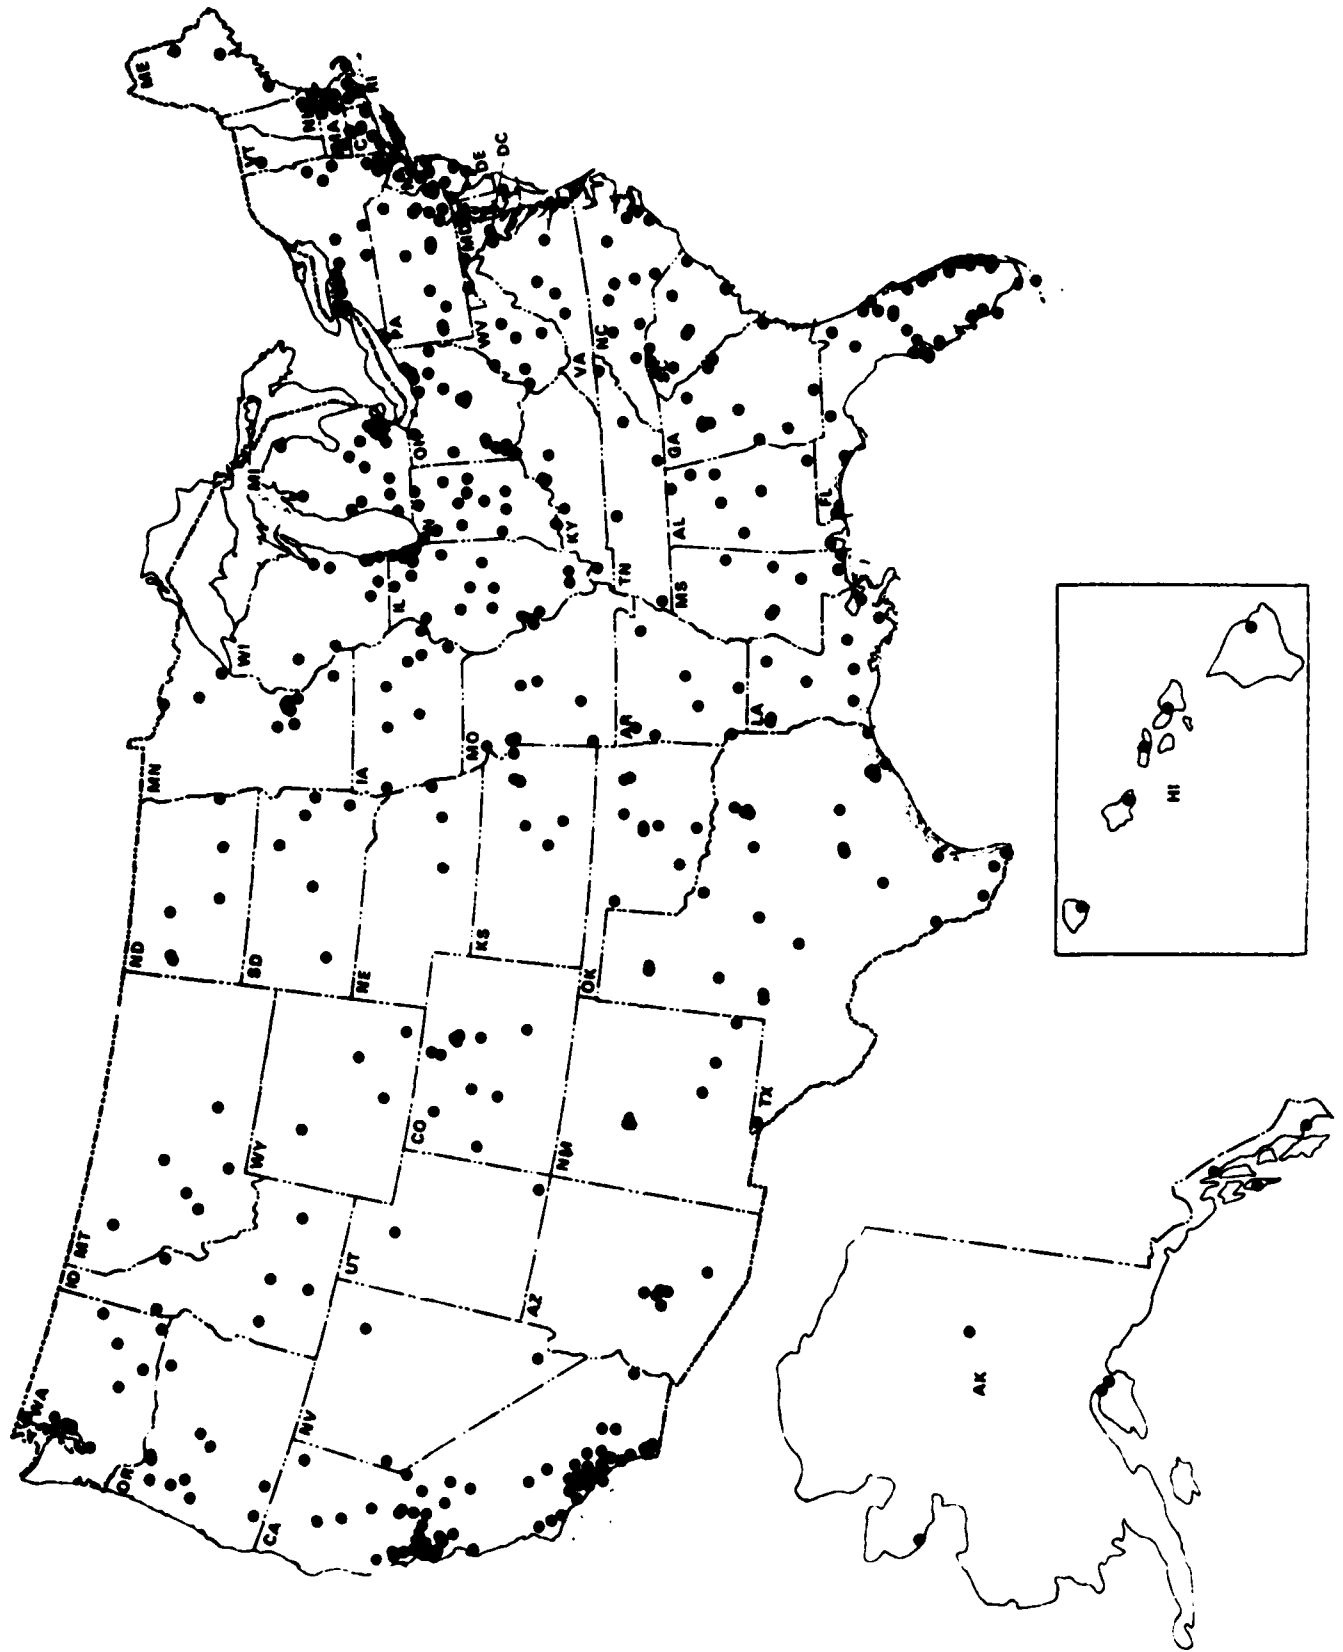

Extent of Local Actions

More than 540 local airports have reported taking some kind of action to reduce aircraft noise or to mitigate the effects of that noise. The geographic distribution of those airports is shown in Figure 1. As can be seen from that figure, every state has at least one airport that has taken action. Many states have six or more such airports.

Figure 1. EXTENT OF LOCAL ACTIONS TO CONTROL AIRPORT NOISE

While many airports reporting local noise actions have scheduled air carrier service, about one half do not. Both large and small cities initiate such actions.

The listing of local actions in this report does not infer FAA review or approval of the appropriateness, impact, or legality of such actions.

Uses of the Data File

This data file is to serve all elements of the agency and other organizations as a central compilation of airport oriented actions taken to control, reduce and/or minimize the impact of aviation noise. It may be used as a quick reference to verify information already acquired or can produce a detailed listing of information for individual or all airports included in the file.

Organization

The data file is listed according to the three letter location identifier (LOCID). It lists the airport's name, the city and state. This report is divided into sections according to the FAA regions.

Description of Categories

The noise control strategies currently consist of 44 categories which describe the airport's procedures for noise abatement or mitigation. The first five categories are used to identify the airport by LOCID, name, city, state and region. The next five categories are being reserved for future data. The following is a brief explanation of each category.

Description of Categories

- 11 State Noise Law - Any law related to airport/aircraft noise control which is governed by the State.

- 12 Local Noise Law or Ordinance - A noise control law or ordinance which is airport/aircraft related and administered at the local level of government.
- 13 Airport Master Plan - This category indicates that an airport has completed an airport master plan.
- 14 ANCLUC Plan - An Airport Noise Control and Land Use Compatibility Plan that has been completed.
- 15 Part 150 Noise Exposure Map Approved - A noise exposure map has been approved by the FAA in accordance with the provisions of FAR Part 150.
- 16 Part 150 Noise Compatibility Plan Approved - An airport noise compatibility plan has been approved by the FAA in accordance with the provisions of FAR Part 150.
- 17 Development of an EIS - One or more Environmental Impact Statements have been completed.
- 18 Noise Monitoring Equipment: Temporary or Permanent - This category includes airports that employ either temporary or permanent noise monitoring equipment.
- 19 Other Noise Control Planning Documents - Any noise control documents which have been completed but are not specifically listed above, e.g., airport noise plan or study.
- 20 Ground Operational Procedures in Effect to Mitigate Noise - Ground operational procedures or restrictions which are in effect for noise abatement purposes.

- 21 Restriction on Ground Run-up - Any restriction involving the time of day or airport location that engine run-ups can be conducted.
- 22 Limit on the Number of Operations by Hour, Day, Month, Year or Noise Capacity - This restriction curbs the number of aircraft departures and/or arrivals in a given time interval.
- 23 Preferential Runway System - This system generally routes all traffic over certain runways in order to minimize aircraft flight over noise sensitive areas.
- 24 Runway Restriction Imposed for Specific Aircraft Type - Any restrictions on specific aircraft using certain runways would be in this category.
- 25 Use Restriction by Aircraft Type or Class - An airport restriction that bans certain types or classes of aircraft either totally or for certain times of day.
- 26 Use Restriction Based on Noise Levels - An airport restriction that bans aircraft which exceed a certain noise level.
- 27 Use Restriction Based On Part 36 - A restriction on aircraft that do not meet one or more of the FAR Part 36 noise level requirements.
- 28 Use Restriction Based On AC 36-3 - A restriction on aircraft that are above some locally-determined noise level, based on the noise levels listed in Advisory Circular 36-3 or later revisions.
- 29 Complete Curfew - Complete closure of an airport during any period of time (usually at night).
- 30 Other Airport Use Restrictions - Any other airport use restrictions not specifically listed in the above categories.

- 31 Arrivals and Departures Over a Body of Water - A restriction which routes arrivals and departures over a body of water for the purpose of avoiding overflight of noise sensitive areas.
- 32 Displaced Runway Threshold - This restriction reduces the runway length available for arrivals and/or departures to minimize off-airport impacts.
- 33 Rotational Runway System - The airport uses a rotational system for the use of certain runways to limit the time that surrounding noise sensitive areas are overflown.
- 34 Terminal Control Area Adjustments - Any adjustments to the terminal control area that involve noise are included in this category.
- 35 Maximum Safe Climb on Takeoff - Rapid climb to altitude to minimize takeoff noise impacts on communities 5 to 10 miles from lift-off.
- 36 Takeoff Thrust Reduction - Low-power climb to altitude to minimize takeoff noise impacts on close-in communities.
- 37 Reverse Thrust Limits - Limitations on the use of reverse thrust during landing.
- 38 Flight Training Restriction - Aircraft are prohibited from making practice takeoffs and approaches either totally or during certain hours of the day.
- 39 Weight or Thrust Limit - This restricts aircraft over a certain weight or thrust limit from using the airport.
- 40 Informal Flight Operation Restriction - Any restriction which is not formally enforced by the airport but requested as a procedure to limit noise.

- 41 Other Specific Flight Operations to Mitigate Noise - This includes any other flight operation restrictions not specifically listed in the above categories.
- 42 Zoning - Any zoning laws intended to restrict incompatible land uses surrounding the noise impact areas of the airport.
- 43 Purchase Land for Noise Control - The airport acquired incompatible land surrounding it for the purpose of alleviating noise impacts.
- 44 Use of Capital Improvements to Direct Development - Actions taken by the local government or airport sponsor which can restrict development in the noise impact areas of the airport while directing development in more compatible land use areas.
- 45 Building Codes and Permits to Control Noise - The local government imposed requirements in noise impacted areas.
- 46 Noise Easements - The purchase of limited property rights in impacted areas for the purpose of restricting noise suits.
- 47 Other Land Use Management Techniques - This includes any other land use techniques not specifically listed in the above categories.
- 48 Purchase Assurance - This is a purchase guarantee applied to a residential property within the lightly or short-term impacted noise areas which assures its saleability.
- 49 Soundproofing Programs - Soundproofing to alleviate the impact of external noise on houses, schools, etc., within the noise impact area.

- 50 Use of Tax or Fee to Shift Flight Operations - A tax or fee on the aircraft operator may be imposed in order to shift their operations thereby reducing the aircraft noise.
- 51 Shift Operations to Another Airport - In order to reduce the aircraft noise this action may be taken.
- 52 Other Cost Benefit Incentives - Any other economic incentives that are not specifically listed in the above categories.
- 53 No Noise Control Programs - Airports listed in this category have no known noise control program.

Acknowledgement

The author wishes to express her appreciation to Steven Albersheim for his assistance in the development of the computer listing program.
